Graduate Institute of Communication Engineering

National Taiwan University, Taipei, Taiwan, ROC

(1) Firstly, make sure your microphone is connected. You can use simple recording program (https://www.mathworks.com/help/matlab/import_export/record-and-play-audio.html) to test whether the recording function is working properly.

(2) Users need to assign sample rate, recording time, and refresh rate.

(3) By performing the program, you can get the time-frequency plot of your voice in real time.
